## EUROPEAN STUDENT CHAPTER

Access the Bulletin of the *American Society for Information Science & Technology (Bulletin)* and the online version of the *Journal of the Association for Information Science & Technology (JASIS&T)* at no charge  
Get discounts for Library and Information Science books in the ASIS&T book store

Have free access to webinars and significantly reduced conference fees

Compete in student contests and win great prizes like attendance of the annual ASIS&T meeting

Get exclusive Job offerings via ASIS&T network and database

Strengthen connections and networking opportunities with ASIS&T students, researchers, and experts throughout the world

Your benefits as an ASIS&T member are:

Network with European students of information science and related disciplines  
Building an infrastructure for student exchange/internships within Europe and around the world

You are a student of information science or related applications and want to know more about research in this interdisciplinary field?

You want to be connected to other students and experts all over the world and like to be part of an international community?

Then catch up on ASIS&T and its European Student Chapter!

## ASIS&T: Association for Information Science & Technology

The Association for Information Science & Technology (ASIS&T) offers you the opportunity to connect with information professionals and researchers and be up to date with new developments in the information sciences and related applications. Since 1937 ASIS&T brings together diverse streams of knowledge, focusing what might be disparate approaches into novel solutions to common problems. ASIS&T bridges the gaps not only between disciplines but also between the research that drives and the practices that sustain new developments.

## The ASIS&T European Student Chapter (ESC)

The **ASIS&T European Student Chapter (ESC)** is the "little sibling" of the European Chapter and offers you the opportunity to take part in a variety of free webinars as well as competitions. It helps you to step into an international connected scientific community. You can meet other European students and discuss with them your first academic approaches as well as socialize with experts from all over the world on the Annual ASIS&T Meeting and other conferences. As a member you can join conferences for significantly reduced fees or participate in the New Leaders Award which offers you free attendance to the Annual Meeting for two years as well as travel allowance.

In the ASIS&T ESC community you can not only be member of an international connected scientific network, but you can actively engage in the community: Be part of the ESC board and develop new ideas for information research communication, create new relationships between peers, generate new research collaborations and form the future information science community.

## The ASIS&T community structure

ASIS&T has over 20 **Regional Chapters and Student Chapters**. For example, the European Chapter is responsible for members from all over Europe. But there also exist Chapters for smaller local regions. As a member you are part of the Chapter responsible for your region. In the Chapter you can meet peers from the same region and collaborate with them. There are Chapter meetings throughout the year.

In the 21 **Special Interest Groups (SIGs)** ASIS&T members from all over the world, who have the same interests, come together. For example, there are peers interested in human computer interaction, metrics, health informatics, information policy, visualization, images & sound, international information issues, and other topics.
